Muhammad Tayyab

Front End Developer

I am a passionate front-end developer with experience in creating user interfaces that are both aesthetically pleasing and highly functional. I understand the importance of creating interfaces that are not only visually appealing but also easy to use and navigate. My skillset includes HTML5, CSS3, JavaScript, Tailwind and React js. I am constantly learning and staying up-to-date with the latest technologies and trends in the industry. I believe that by keeping an open mind and a willingness to learn, I can provide the best solutions for my clients.

Codes Orbit

Front end developer

- As a Front-End Developer at Codes Orbit, I had the opportunity to apply and expand my skills in web development while working in a collaborative and dynamic team environment. I actively contributed to various projects and gained valuable hands-on experience in front-end development.
- Collaborated with the development team to design and implement user-friendly, responsive web interfaces using HTML, CSS, Tailwind, JavaScript and React Js.
- Assisted in the creation and maintenance of websites, ensuring cross-browser compatibility and optimal performance.
- Conducted thorough testing and debugging to identify and resolve any front-end issues or bugs.
- Participated in code reviews, providing constructive feedback and suggestions to enhance overall code quality.
- Stayed up to date with the latest front-end development trends and best practices, actively seeking opportunities for self-improvement and growth.
- Actively participated in code reviews, providing constructive feedback and suggestions for code optimization and best practices.
- Implemented responsive design techniques to deliver seamless user experiences across various devices and screen sizes.

Projects

Air BNB

I had the opportunity to contribute to the creation of an engaging and user-friendly platform that aimed to replicate the world-renowned Airbnb experience. My primary responsibilities centered around the design and functionality of two key components: the Main Screen and the Listing Page, both of which are pivotal in attracting and retaining users.

- User-Centric Design: I designed the Screens with a strong focus on user experience. The layout, visual elements, and navigation were carefully crafted to ensure ease of use and quick access to critical information.
- Engagement: I utilized intuitive user interface elements and high-quality visuals to capture the attention of visitors, encouraging them to explore further and engage with the platform.
- Responsiveness: I ensured that the Main Screen was responsive and optimized for various devices, including desktops, tablets, and mobile phones, to reach a broader audience.

Netflix

My work on the Front-End Design of the Netflix clone application aimed to recreate the captivating streaming experience while also emphasizing user-friendly navigation. The project challenged me to deliver an immersive interface that replicated the high standards set by Netflix, and I am proud of the result.
